Xiaomi (1810 HK)

Last price:	HK\$28.06
Support levels:	HK\$26.38/HK\$25.22
Resistance levels:	HK\$32.40/HK\$35.64

The price managed to defend its support boundary with a potential bullish flag continuation pattern. The RSI is above its neutral 50-midline with a positive upward slope. A decisive breakout above the upper boundary of the flag pattern will confirm the trend continuation, opening the path for sustained upside expansion targets.

Average timeframe: Around two weeks.

CITIC (0267 HK)

Last price:	HK\$13.50
Support levels:	HK\$12.66/HK\$12.43
Resistance levels:	HK\$14.94/HK\$16.28

The penetration of historical peak resistance marks a transition into a high-momentum volatility expansion phase, leaving zero overhead chart resistance to impede progress. The RSI is holding firmly in overbought parameters, reflecting powerful trend persistence. As long as the newly support floor is defended, it heavily favours a sustained price discovery phase toward prospective upside expansion zones.

Average timeframe: Around two weeks.
