Company Update | Geely Auto (175 HK/BUY/HK\$14.97/Target: HK\$29.00)

Page 2 →

- Geely may miss its 2026 sales target of 3.45m. It aims to double exports from around 1m to 2m in 1-2 years via iHEV, Zeekr, and overseas capacity. Net profit per vehicle will be boosted by a rising share of premium models and export in sales. All-in, we raise 2026 EPS by 7%, keep 2027 EPS unchanged, and trim 2028 EPS by 3%, based on lower sales estimates of higher profit per vehicle. Maintain BUY; target price: HK\$29.00 (10x 2027F PE).

Disclaimer: In Traders' Corner, technical analysis is carried out purely based on charting patterns, price movements and trends, and is thus independent of the fundamental research views of our analysts. As a result, and from time to time, we may make a technical recommendation that is opposite to our fundamental BUY/HOLD/SELL rating.

Geely Auto (175 HK)

Exports And New Technologies Offset Weak Domestic Sales

Highlights

- 2026 sales will probably miss the 3.45m target on the ongoing run rate.
- Geely targets doubling exports from about 1m to 2m within 1-2 years on model launches, eg iHEV, Zeekr, and overseas capacity.
- Fast-charging, L3 ADAS, and iHEV technologies will drive growth.
- Exports and premium models underpin net profit per vehicle.
- We raise 2026 EPS by 7%, keep 2027 EPS unchanged, and trim 2028 EPS by 3%, based on lower sales estimates of higher profit per vehicle.
- We estimate 3Q26 net profit at Rmb5,525m (+39.5% yoy/+7.9% qoq).
- Maintain BUY and target price of HK\$29.00 (10x 2027F PE).

Analysis

- **2026 sales will probably miss the 3.45m-unit target, based on ongoing run rate.** 9M26 sales of 2.235m units (+3.0% yoy) make up 64.8% of the full-year target. It requires average sales of 404,840 units/month (+42.2% yoy) in 4Q26 to reach the company's full-year target of 3.45m units, which seems unlikely. We now expect Geely's 2026 sales at 3.00m-3.45m units on the ongoing run rate, vs its target of 3.45m units (+14.1% yoy).
- **Domestic sales dragged by high oil prices, and Geely will add BEVs in 2H26.** Domestic sales fell 23.3% yoy to 1,437,811 units in 9M26, which management attributed to higher oil prices dampening internal combustion engine (ICE) car and plug-in hybrid electric vehicle (PHEV) sales, with Galaxy skewed towards PHEVs. The new EV models, eg Galaxy TT and new E5, will boost sales in 2H26. Channel inventory level stands at below one month, implying no need for further destocking, except for certain models in transition. Looking into 2027, Geely expects to increase its market share from 11% in 2026 as China's auto sales stop falling.
- **Exports are offsetting part of the domestic weakness.** 9M26 exports of 797,670 units (+169% yoy) are 80% of the full-year target of 1m units. Exports exceeded 100,000 units a month from June. September export dipped 3% mom to 106,685 units, which management attributed to production at Proton in Malaysia. Management expects export at around 100,000 units a month in 4Q26, with the mix shifting to premium models such as the Zeekr 9X. The preliminary 2027 export target is 1m-2m units. The long-term aim is two-thirds of sales overseas, vs 35% in 2026.

Company Description

Based in Hangzhou of China, Geely Auto (Geely) manufactures and sells vehicles under the brands of Geely, Galaxy, Zeekr and Lynk & Co.

- **Local production reduces exposure to trade barriers.** Geely Auto (Geely) has agreed to take a 34% stake in a Ford plant in Valencia, Spain (500,000 units/year), which it will revamp and automate. Geely will use the plant for assembling modules from China into vehicles for the European market, and it is aimed to start operations by end-27 or early-28. Geely also partners with Renault in Brazil and Proton in Malaysia for supplies to the Latin America and Southeast Asia markets respectively.
- **L3 autonomous driving will not contribute before mid-27.** Geely uses its own G-ASD system. The Zeekr 9X holds an L3 permit covering all 9,224 km² of Hangzhou, but L3 models can only be certified after 1 Jul 27, and each city must grant its own permit. L3 differs from L2 NOA in having redundancy, as the OEM carries the liability.
- **Geely's new fast-charging technology will be rolled out through 22,000 stations by end-27.** The 6C battery charges 10-97% in 10 minutes and the 12C in 8 minutes 40 seconds, on 900V (Zeekr), 400V (Galaxy) and 800V (Galaxy TT, E5 and Warship) architectures. A 27%-owned associate of Geely, ie not consolidated, will build 22,000 stations with 100,000 guns by end-27. With partnership with NIO, the construction cost for each charging station would be lower than the industry's Rmb400,000-500,000.
- **Geely plans to replace all its ICE models with iHEVs.** The intelligent hybrid electric vehicle (iHEV) launched in China in Apr 26 and goes overseas in 2027. Geely's iHEV is 12% more fuel-efficient than Toyota's HEV as the former pairs with a fast-charging, fast-discharging 60C battery. This enables quicker energy recovery and deployment, allowing more efficient engine operation and greater electric assistance. Geely sees a global addressable market of 10m-20m units for its iHEV, based on Toyota's HEV sales.
- **Cut our 2026-28 sales volume estimates by 7%/13%/16% to 3.20m/3.75m/4.35m units respectively, including 1.13m/1.50m/2.00m units of overseas sales,** based on the lower-than-expected 9M26 sales and the company's more conservative export targets in 2027-28. ASP assumptions of Rmb112,000/Rmb120,000/Rmb128,000 are unchanged.
- **Raise our 2026-28 net profit per vehicle assumptions by 18%/15%/15% to Rmb6,800/Rmb7,300/Rmb7,850,** vs Rmb6,806 in 1H26, based on the upbeat margins of the premium products and exports.
- **Geely expects margins to hold up well in 2H26, based on optimisation of sales mix.** Net profit per vehicle depends on the shares of exports and premium models in sales. Exports earn a gross margin about 10ppt above domestic sales, and overseas net profit per vehicle of Rmb13,000-15,000 is roughly three times the domestic level. 4Q26 launches are mainly premium models, and the price war has eased though new models are priced lower. The drop in battery costs offsets the rise in chip costs.

Earnings Revision/Risk

- **We raise 2026 EPS by 7% to Rmb1.98 (net profit Rmb21.36b), keep 2027 EPS unchanged at Rmb2.54 (Rmb27.37b), and trim 2028 EPS by 3% to Rmb3.17 (Rmb34.17b),** on lower sales volume but higher net profit per vehicle.
- **For 3Q26, we estimate net profit at Rmb5,525m (+39.5% yoy/+7.9% qoq),** on sales volume of 812,523 units (+6.8% yoy/+13.9% qoq) and net profit per vehicle of Rmb6,800 (+30.7% yoy/-5.3% qoq).

Valuation/Recommendation

- **Maintain BUY and keep target price at HK\$29.00, pegged to 10x 2027F PE, on par with the historical mean.** Geely trades at 6.5x 2026F PE and 5.0x 2027F PE, much lower than the historical mean of 10x.

Share Price Catalyst

- Strong monthly sales, debuts of blockbuster new models, 3Q26 results beat expectations.

Technical Analysis

Analyst(s)

Greater China Research Team
research-hk@uobkh.com

Tham Mun Hon, CFA

munhon.tham@uobkh.com
+852 2236 6799

CLP (0002 HK)

Last price:	HK\$76.05
Support levels:	HK\$74.60/HK\$71.45
Resistance levels:	HK\$79.15/HK\$84.10

Price rebounded from its previous low support zone with a hammer candlestick pattern. The RSI is curving upward from oversold boundaries, but remains below its neutral 50-midline. As long as price defends the hammer's low on any subsequent lower-timeframe retests, we should see a continued upward rebound towards the higher resistance.

Average timeframe: Around two weeks.

China Unicom (0762 HK)

Last price:	HK\$5.55
Support levels:	HK\$5.38/HK\$5.26
Resistance levels:	HK\$6.08/HK\$6.27

Price could be bottoming at HK\$5.38, signalling an initial defense of the structural support. The RSI is printing a prominent bullish divergence warning, which points to an underlying exhaustion of sell-side momentum. As long as price defends the HK\$5.38 demand floor, we see a continued upward rebound towards the overhead resistance targets.

Average timeframe: Around two weeks.
